-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Drawing Objections***

The drawings are objected to because of the following informalities:

Fig. 6A: Numeral 336 must be changed to the appropriate reference numeral since there is no corresponding description of numeral 336 in the specification.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Art Unit: 3742

### ***Disclosure Objections***

The disclosure is objected to because of the following informalities:

Para. 0043: The sentence ending with “comes up to higher” is incomplete. The examiner presumes the word “temperature” was omitted. Appropriate correction is required.

### ***Claim Objections***

Claims 5-8 are objected to because of the following informalities:

Claim 5: In line 2, “emitted” must be changed to “emitting.”

Appropriate correction is required.

### ***Claim Rejections - 35 U.S.C. § 103(a)***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Subject matter developed by another person, which qualifies as prior art only under subsection (f) and (g) of section 102 of this title, shall not preclude patentability under this section where the subject matter and the claimed invention were, at the time the invention was made, owned by the same person or subject to an obligation of assignment to the same person.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over JP6-11689 in view of 2001-326488. JP6-11689 discloses an LCD heater 1 comprising a main heater controller 19 and a thermal fuse (i.e., a “temperature controlled override switch”) that disables the heater independent of the main heater controller to prevent

Art Unit: 3742

thermal runaway. See abstract and computer English translation. See also Figs, 1, 3, and 6.

The claim differs from JP6-11689 in calling for the housing to have a vent system for the cavity. But vented housings for heated LCD panels are well known in the art. 2001-326488, for example, in Fig. 2 discloses a housing for LCD panel 3 with an inlet and outlet that provides airflow through the housing. See abstract and Para. 0011 of the computer translation. Such an airflow through the LCD housing ensures the LCD heating element does not overheat thereby prolonging the life of the display device.

In view of JP6-11689, it would have been obvious to one of ordinary skill in the art to vent the housing of JP6-11689 to ensure the LCD heating element does not overheat thereby prolonging the life of the display device.

#### ***Allowable Subject Matter***

Claims 2-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### ***Other Pertinent Prior Art***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Applicant should (1) separately consider the art, and (2) consider the art together with the previously cited prior art for potential applicability under 35

Art Unit: 3742

U.S.C. §§ 102 or 103 when responding to this action. US 735, JP 723, JP 689, JP 765, JP 723 disclose LCD heaters relevant to the instant invention.

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John A. Jeffery whose telephone number is (703) 306-4601. The examiner can normally be reached on Monday - Thursday from 7:00 AM to 4:30 PM. The examiner can also be reached on alternate Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robin Evans, can be reached on (703) 305-5766. All faxes should be sent to the centralized fax number at (703) 872-9306.
